

Novra Technologies Finalizes Sale to G2 Satellite Solutions Company

Novra Technologies Inc. (NVI:TSX:Venture), a provider of broadband technologies for satellite, cable and wireless networks, finalized an order from G2 Satellite Solutions Company to provide S75 DVB-S receivers. G2 Satellite Solutions Company, formerly operating as Hughes Global Services (HGS), is a division of PanAmSat Corporation.

As a member of Novra's DVB receiver family, the S75 brings superior throughput performance and flexibility to a very cost-effective solution. The S75 has been designed to enable delivery of the next generation of broadband services. Its RJ45 Ethernet connection provides powerful and distinct installation, performance and maintenance advantages over other form factors.

The S75 is perfectly suited for consumer or small-medium enterprise use, delivering IP based applications like distance education, file distribution, streaming content and Internet over satellite to a single host or to a network of hosts. The S75 can also easily be used for embedded or special function applications that require low-level access to the DVB transport stream.

Don Gonzales, Senior Vice President of G2 Satellite Solutions Company, stated: "Novra's S75 DVB receiver was exactly what we needed to support expanded services for an important U.S. Government customer for whom we provide a 6 Mbps IP multicast service in the U.S., Europe, Middle East, and Asia."

Harris Liontas, President & CEO of Novra stated, "Having G2 test and qualify our S75 and then back that up with an initial order is very satisfying for our team at Novra, and validates our marketing and engineering efforts. We are pleased to have the opportunity to work with G2, a world-leading organization, and we look forward to a long term relationship."

About Novra

www.novra.com

Novra Technologies offers premium broadband products, applications and services centered around DVB-IP and multicasting technology. Current products include the S75 and C75 (high-throughput, cost-effective DVB satellite and cable receivers), the SG75 DVB-S gateway, DisseMedia (a multicast file server technology) and the SSP100 (a broadband media store and play appliance).

About G2 Satellite Solutions

www.g2satellitesolutions.com

G2 Satellite Solutions Company, formerly Hughes Global Services, Inc. (HGS), provides end-to-end satellite communications (SATCOM) services to government customers, both domestically and internationally, as well as to certain private sector customers. G2 Satellite Solutions tailors unique solutions from commercially available satellite products and services. As a value-added reseller representing an extensive array of satellite bandwidth and terminal providers, G2 Satellite Solutions is able to offer its customers one stop shopping for integrated, worldwide satellite communications.
