

PRESS RELEASE: Novra Technologies Inc. announces support from NRC's Industrial Research Assistance Program

WINNIPEG, MB – September 18, 2001 - Novra Technologies Inc. (CDNX: NVI) today announced that it has signed an agreement with the National Research Council (NRC) of Canada's Industrial Research Assistance Program (IRAP) for funding of \$498,000 to support the development and commercialization of Novra's S50 DVB-S Receiver, SR50 Transceiver, SG50 Media Gateway and DisseMedia™, a reliable multicast distribution system. This investment by NRC is to be repaid in stages by Novra from gross revenues beginning in the first quarter of 2004 and ending on December 31, 2007.

"This investment will help us to accelerate the deployment of Novra's broadband communication solutions," said Dr. Moe Barakat, President and CEO of Novra Technologies. "Our goal now is to bring these solutions to full commercialization, including installation at currently identified and newly emerging customers around the world."

About Novra

Novra Technologies Inc. offers its clients end-to-end solutions for multi-media network applications with its premium broadband products, applications and services. Novra designs, develops and markets network Internet applications and products for wireless, digital television (DTV) and satellite networks worldwide.

The Canadian Venture Exchange has not passed upon the merits of the proposed transaction and has neither approved nor disapproved the contents of this press release.
