

***Novra to unveil new product at ITU Telecom Asia***

November 18, 2002, Winnipeg, Manitoba

Novra Technologies Inc. (TSX Venture: NVI), a provider of broadband equipment for satellite, cable and wireless networks, today announced that it will unveil their newest product, the C75, a high throughput cable receiver, at the ITU Telecom Asia show taking place in Hong Kong December 2-7, 2002. Novra will be in booth number 2101.001 in the Canadian Pavilion.

The C75 is designed to enable service providers and enterprises to deliver a wide array of solutions to their end users, whether it's distance education, corporate training or broadcast TV, the C75's flexibility and functionality delivers a cost effective solution to the cable market.

Harris Liontas, President and CEO of Novra stated that, "We are very excited about this product release, as it is a strategic complement to our satellite product offering. Service providers are looking for a robust product to deliver services to their customers and the C75 meets this need with a solid base of features. We will be working with our channel partners to capture market share in the cable industry."

***About Novra***

Novra Technologies offers premium broadband products, applications and services centered around DVB-IP and multicasting technology. Current products include the S75 and C75 (high-throughput, cost-effective DVB satellite and cable receivers), the SG75 based upon the S75 but offering two-way connectivity), DisseMedia (a reliable file distribution system using multicast technology) and the SSP100 (a broadband media store and play appliance that integrates Novra's receiver and reliable multicast file delivery technology). The company website is [www.novra.com](http://www.novra.com).
